Instructional Supervision System

A data-driven automated system for monitoring and evaluation of teachers' performance

Reynel Mario Canor
La Salle Green Hills, Philippines

New chat

Act as a subject coordinator. Review every teacher's curriculum map, learning guide and classroom observation for three trimesters. Then rate each one fairly for merit, tell each exactly what to improve, and find your department's training needs. Show your evidence.

Put on your Subject Coordinator hat.

01

Problem

Why supervision data wasn’t answering the prompt

PROBLEM · YOUR JOB AS COORDINATOR, WITHOUT A SYSTEM

Manual records. Isolated tools. Feedback that can’t diagnose.

Fragmented data

CM, LG and observation checks recorded by hand, each in its own format.

Hidden trends

Tracking growth meant re-reading records. Training needs stayed invisible.

Weak merit basis

Compiling evidence was slow; feedback rarely said what to fix.

PROBLEM · WHY IT MATTERS

Evaluation shapes a teacher's growth — and pay

RA 10912

The Philippine CPD Act requires teachers to keep upgrading — which needs **objective** evidence of the gaps.

11 of 19

countries in an OECD appraisal study link evaluation results to **salary**.

Sources: Republic Act 10912 (2016); OECD (n.d.); Darling-Hammond et al. (2017)

PROBLEM · RESEARCH QUESTIONS

Four questions guided the study

1 **Challenges:** what hinders recording, monitoring and sharing teacher data?

2 **Design:** how can a digital system evaluate CMs, LGs and observations?

3 **Output:** how does it present data for merit and training needs?

4 **Impact:** how does it improve coordinators’ supervision practice?

02

Solution

One integrated analytics system for planning, design and teaching

SOLUTION · RQ2 · CONSTRUCTIVE ALIGNMENT (BIGGS, 1999)

Evaluate the whole teaching chain

PLAN

CM Analytics

Curriculum Map: are intended outcomes aligned?

28

INDICATORS

DESIGN

LG Analytics

Learning Guide: instructional designs ID1–ID9

34

INDICATORS

IMPLEMENT

COT Analytics

Classroom Observation: teacher and student look-fors

20

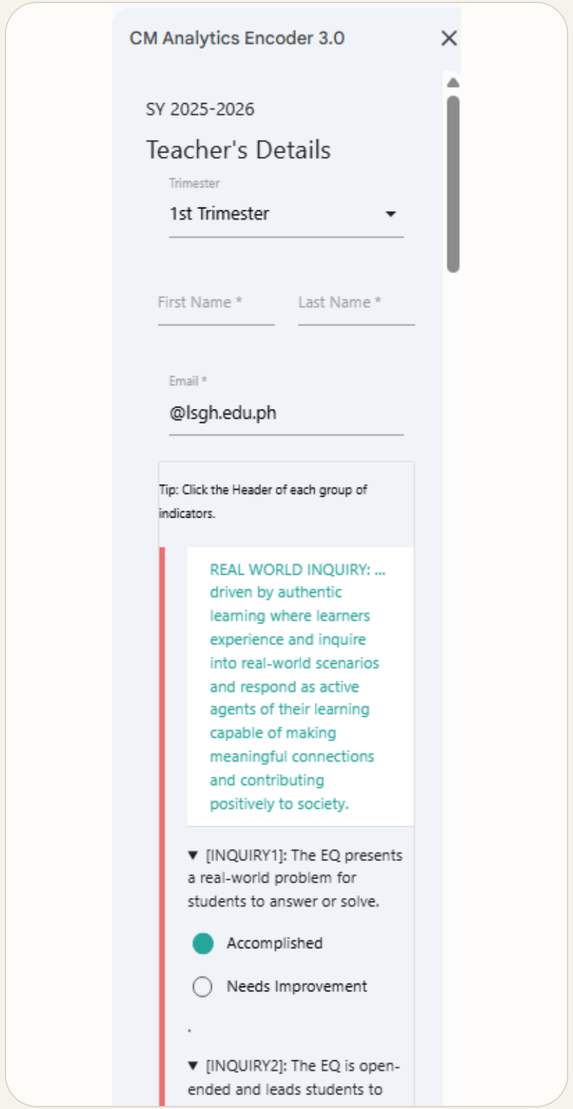

INDICATORS

Indicators anchored on the LSGH Curriculum Framework and approved by school authorities

SOLUTION · RQ2 · SHEETS + APPS SCRIPT

One click turns a checklist into a report

INPUT	Tick **Accomplished** or **Needs Improvement** per indicator in a sidebar
PROCESS	Scores convert to a **4-point scale** and save to a central database
OUTPUT	**PDF report** emailed to the teacher; the **dashboard** updates

SOLUTION · RQ2 · DESIGN-BASED RESEARCH

Six cycles of use and refinement

CYCLE 1

Indicator checklist

Auto-feedback on unmet indicators; raw counts only

CYCLE 2

Scores and radars

Normalized scale; weights so critical indicators count

CYCLE 3

Analytics, extended

Indicator-level percentages; CM model applied to LG, COT

CYCLE 4

Data integrity

Per-indicator storage and validation checks

CYCLE 5

Shared scoring

One score set for co-written maps and guides

CYCLE 6

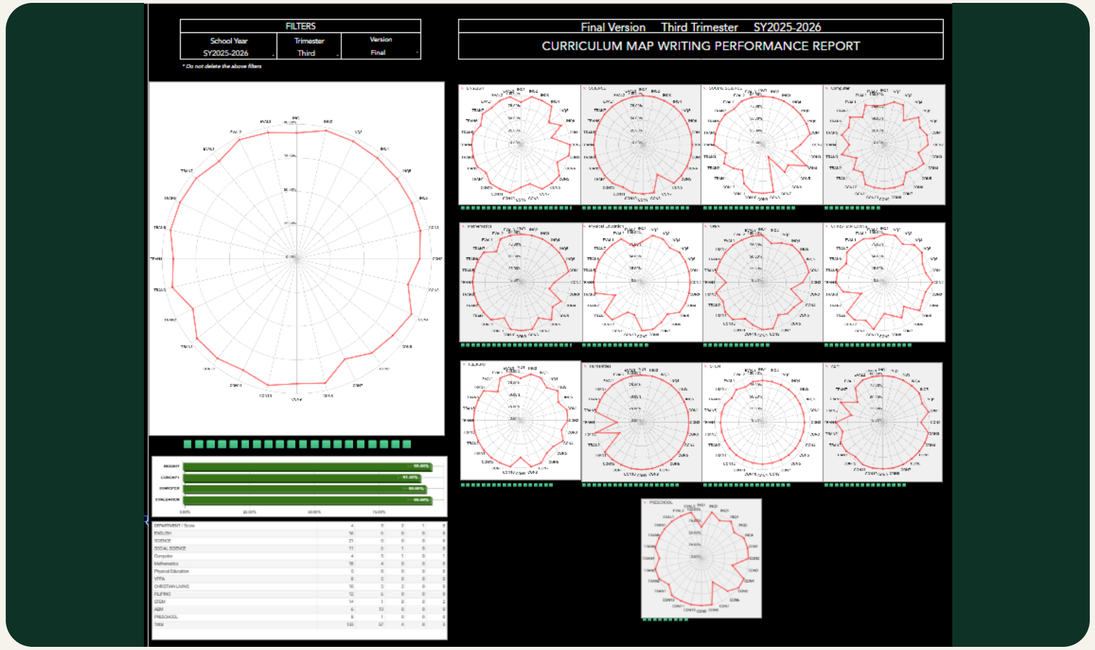

Decision support

Auto-emailed reports; department dashboards

Version 3.0, after three years of use, now feeds the school’s merit rating

SOLUTION · RQ3 · DASHBOARDS

The dips are the training needs

CM and LG radars show every indicator at once. A dip, like **ID5**, is a training need.

COT gauges compare department means; the tracker shows **99.55%** of teachers observed.

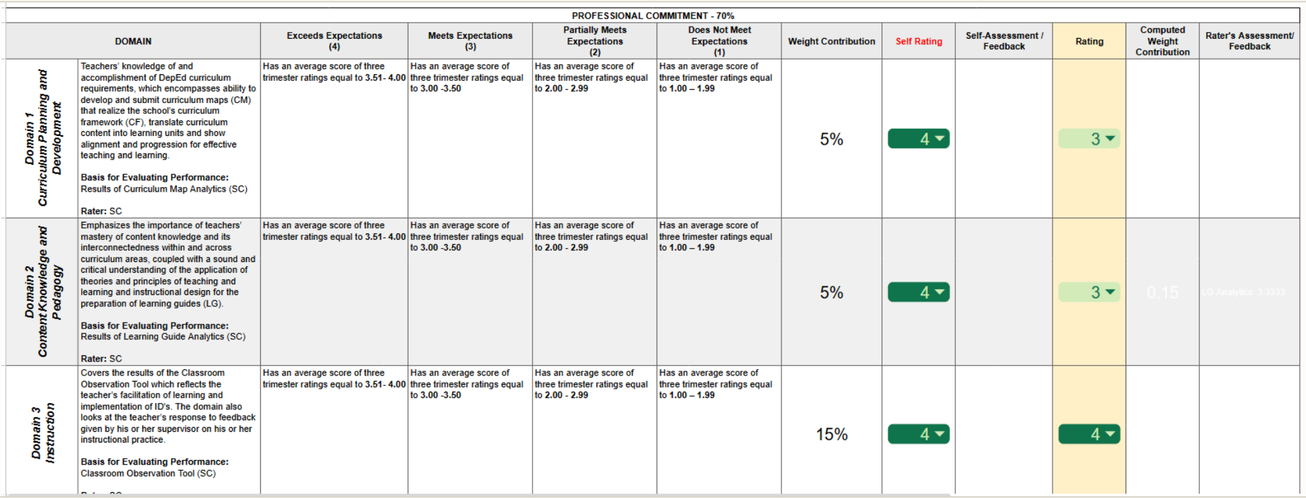

SOLUTION · RQ3 · MERIT RATING

Evidence becomes one merit score

5% **CM** · Domain 1
Curriculum Planning

5% **LG** · Domain 2
Content, Pedagogy

15% **COT** · Domain 3
Instruction

PROFESSIONAL COMMITMENT - 70%

DOMAIN		Exceeds Expectations (4)	Meets Expectations (3)	Partially Meets Expectations (2)	Does Not Meet Expectations (1)	Weight Contribution	Self Rating	Self-Assessment / Feedback	Rating	Computed Weight Contribution	Rater's Assessment/ Feedback
Domain 1 Curriculum Planning and Development	Teachers' knowledge of and accomplishment of DepEd curriculum requirements, which encompasses ability to develop and submit curriculum maps (CM) that realize the school's curriculum framework (CF), translate curriculum content into learning units and show alignment and progression for effective teaching and learning. **Basis for Evaluating Performance:** Results of Curriculum Map Analytics (SC) **Rater:** SC	Has an average score of three trimester ratings equal to 3.51- 4.00	Has an average score of three trimester ratings equal to 3.00 -3.50	Has an average score of three trimester ratings equal to 2.00 - 2.99	Has an average score of three trimester ratings equal to 1.00 – 1.99	5%	4		3		
Domain 2 Content Knowledge and Pedagogy	Emphasizes the importance of teachers' mastery of content knowledge and its interconnectedness within and across curriculum areas, coupled with a sound and critical understanding of the application of theories and principles of teaching and learning and instructional design for the preparation of learning guides (LG). **Basis for Evaluating Performance:** Results of Learning Guide Analytics (SC) **Rater:** SC	Has an average score of three trimester ratings equal to 3.51- 4.00	Has an average score of three trimester ratings equal to 3.00 -3.50	Has an average score of three trimester ratings equal to 2.00 - 2.99	Has an average score of three trimester ratings equal to 1.00 – 1.99	5%	4		3	0.15	
Domain 3 Instruction	Covers the results of the Classroom Observation Tool which reflects the teacher's facilitation of learning and implementation of ID's. The domain also looks at the teacher's response to feedback given by his or her supervisor on his or her instructional practice. **Basis for Evaluating Performance:** Classroom Observation Tool (SC)	Has an average score of three trimester ratings equal to 3.51- 4.00	Has an average score of three trimester ratings equal to 3.00 -3.50	Has an average score of three trimester ratings equal to 2.00 - 2.99	Has an average score of three trimester ratings equal to 1.00 – 1.99	15%	4		4		

3-trimester average: 3.51–4.00 Exceeds · 3.00–3.50 Meets · 2.00–2.99 Partially · below 2 Does not meet

03

Results

What changed after three years of use

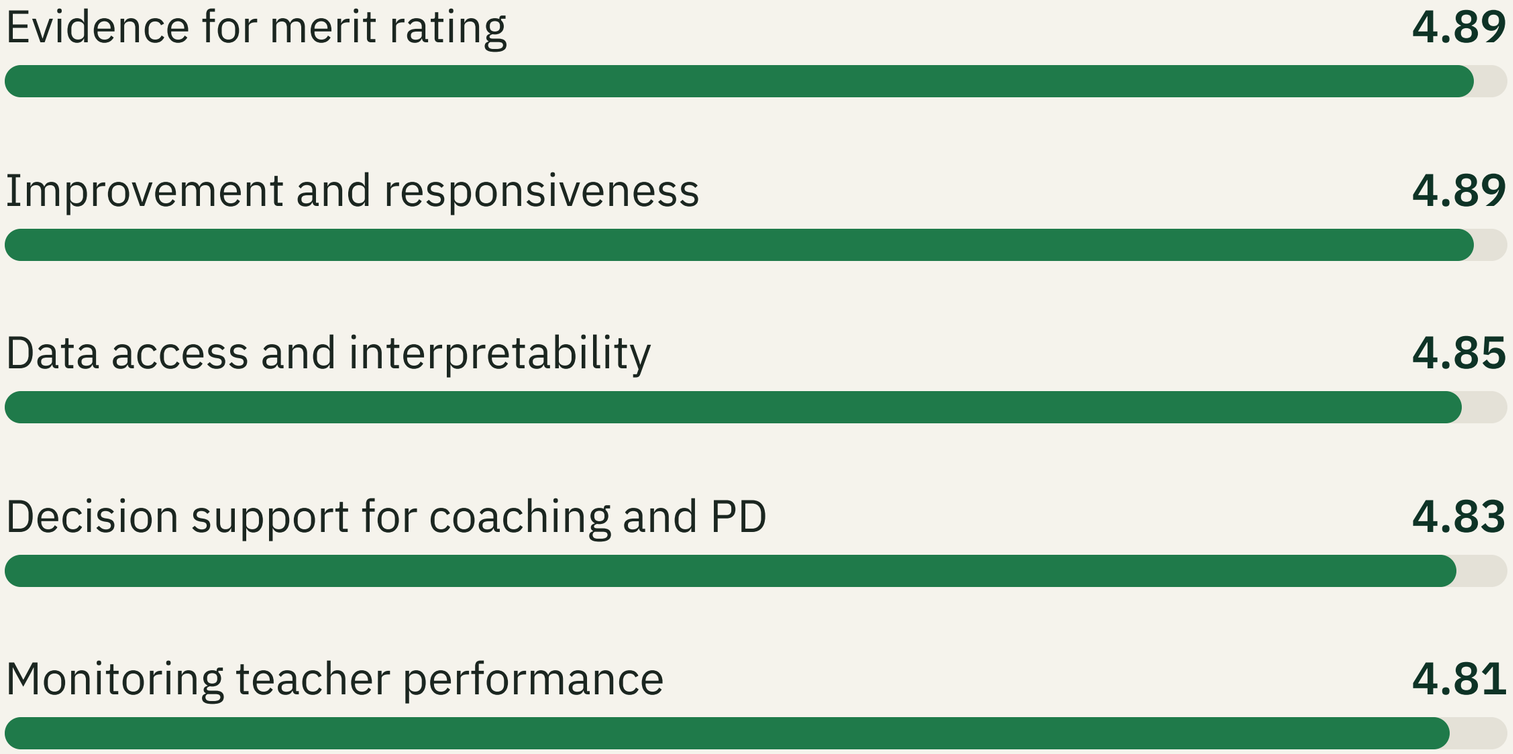

RESULTS · RQ1 · CHALLENGES IN SUPERVISION

Six challenges, each met by design

Challenge found	System response
Fragmented records, each in its own format	One database, approved indicators
Manual recording and compiling	Sidebar encoding, automatic scoring
No way to track performance over time	Per-indicator storage, trend dashboards
Raw counts hid critical gaps	Weighted, normalized 4-point scores
Re-encoding co-written CMs and LGs	Shared scoring for team outputs
Slow, manual feedback to teachers	PDF reports auto-emailed via Gmail

RESULTS · RQ4 · COORDINATOR SURVEY (N = 10)

Every construct rated above 4.8

5.00

median on all five constructs

SD 0.28–0.35 · no rating below 4.00

Bar length = mean out of 5. Survey is supporting evidence alongside the DBR findings.

RESULTS · RQ4 · IN COORDINATORS' WORDS

"...ang kalakasan at kailangan pang paunlarin ng mga guro at ng department."

"...the strengths of the teachers and the department, and what still needs developing."

> "...design more targeted and specific action plans."

> "Averages of the three components (CM, LG, and COT)... were available."

> "...to see specific areas that need improvement" — in vertical meetings.

RESULTS · BACK TO THE PROMPT

> **Act as a subject coordinator.** Review… rate each fairly for merit… tell each what to improve… find training needs. Show your evidence.

- **Review everything** — 82 indicators across CM, LG, COT
- **Rate fairly** — trimester averages feed 25% of merit weights
- **Say what to improve** — indicator-level PDF, auto-emailed
- **Find training needs** — radar dips by subject and department

The coordinator still decides. Now the evidence comes with the decision.

LIMITATIONS AND RECOMMENDATIONS

Honest limits, clear next steps

Limitations

- No causal claim on teacher or student gains
- Teacher-made assessments not analyzed
- Indicators specific to LSGH
- Only as good as the evaluator’s input
- Google Sheets limits scale and security

Recommendations

- Keep calibrating the scoring model
- Tighten access control and user roles
- Standardize teacher identity records
- Add a report preview before sending
- Review indicators periodically

> Act as the audience. Ask the researcher anything.

Thank you

NEXT STEP · LEARNING OUTCOMES ANALYTICS

Evaluation completes the cycle

1 · PLANNING

CM + LG Analytics

Is the plan aligned with intended outcomes?

In use

2 · IMPLEMENTATION

COT Analytics

Is the plan carried out in the classroom?

In use

3 · EVALUATION

Learning Outcomes Analytics

Did students actually learn? Results feed back into planning.
